Contents Volumes 93–94

Preface
A. Chikán xiii

Opening plenary session

Evaluation of two simple extreme transshipment strategies
S. Minner and E.A. Silver 1

Trend breaks in US inventory to sales ratios
F.O. Irvine 13

Comparing CONWIP, synchronized CONWIP, and Kanban in complex supply chains
K. Takahashi, Myreshka and D. Hirotani 25

The role of ERP tools in supply chain information sharing, cooperation, and cost optimization
P. Kelle and A. Akbulut 41

A simple decision rule for decentralized two-echelon inventory control
S. Axsäter 53

Special Sections
Section I: Economics of Inventories

Macroeconomic characteristics and inventory investment: a multi-country study
A. Chikán, E. Kovács and T. Tátrai 61

Inventory investment and output volatility
F.O. Irvine and S. Schuh 75

Measuring the convexity of the cost function
M. Ghali 87

An alternative estimate of real inventory change for national economic accounts
C. Ehemann 101

Optimal inventory policies when sales are discretionary
H.E. Scarf 111

Section II: Inventory Management

Logistics customer service levels in Poland: Changes between 1993 and 2001
D. Kisperska-Moroń 121

Inventory management: Is there a knock-on effect?
G. Vastag and D.C. Whybark 129

doi:10.1016/S0925-5273(04)00337-8

The role of C-products in providing customer service—refining the inventory policy according to customer-specific factors
J. Huiskonen, P. Niemi and T. Pirttilä 139

The relationship between UK manufacturers' inventory levels and supply, internal and market factors
A. Oke and M. Szwejczewski 151

Motives behind purchasing consortia
E. Tella and V.-M. Virolainen 161

Cost-parametric analysis of lateral transshipment policies in two-echelon supply chains
J. Burton and A. Banerjee 169

Controlling inventories in a supply chain: A case study
E.P. Musalem and R. Dekker 179

Concurrent pricing and lot sizing for make-to-order contract production
A. Banerjee 189

Model and analysis of integrated production–inventory system: The case of steel production
S. Zanoni and L. Zavanella 197

Logistics in Bulgarian manufacturing companies
P. Dimitrov 207

Worst-case analysis of the full load policy in the single link problem
L. Bertazzi and M.G. Speranza 217

Production planning: An improved hybrid approach
M.D. Byrne and M.M. Hossain 225

Order allocation in a multiple-supplier environment
R. Kawtummachai and N. Van Hop 231

Advanced available-to-promise: Classification, selected methods and requirements for operations and inventory management
R. Pibernik 239

Inventory management in supply chains: A bargaining problem
E. Sucky 253

Management control and the production environment: A review
P. van Veen-Dirks 263

The complex relationship between inventory control and organisational setting: Theory and practice
J. de Vries 273

Section III: Mathematical Models of Inventories

Considering stochastic lead times in a manufacturing/remanufacturing system with deterministic demands and returns
O. Tang and R.W. Grubbström 285

The effects of emission trading on production and inventories in the Arrow–Karlin model
I. Dobos 301

Stocking decisions for repairable spare parts pooling in a multi-hub system
H. Wong, D. Cattrysse and D. Van Oudheusden 309

Timing production in LP models in a rolling schedule
J.M. Spitter, A.G. de Kok and N.P. Dellaert 319

Eliminating drift in inventory and order based production control systems
S.M. Disney and D.R. Towill 331

Stability of perishable goods in cold logistic chains
M. Bogataj, L. Bogataj and R. Vodopivec 345

Turnpike policies for periodic review inventory model with emergency orders
S. Bylka 357

Lot sizes in a capacity constrained facility—a simulation study of stationary stochastic demand
P. Brander, E. Levén and A. Segerstedt 375

Integrated inventory models with controllable lead time and backorder discount considerations
J.C.-H. Pan and Y.-C. Hsiao 387

Replenish-up-to inventory control policy with random replenishment intervals
K. Ertogral and M.A. Rahim 399

Integer-ratio policies for distribution/inventory systems
B. Abdul-Jalbar, J. Gutiérrez and J. Sicilia 407

The hotel yield management with two types of room prices, overbooking and cancellations
T. Koide and H. Ishii 417

Base-stock policies for the lost sales inventory system with Poisson demand and Erlangian lead times
S.G. Johansen 429

A discounted cash flow approach to the base stock inventory model
R.M. Hill and T.P.M. Pakkala 439

A continuous production–inventory problem with regeneration cycles
R. Rempała 447

Sensitivity results considering rescheduling by AND/OR graphs
D. Hvalica and L. Bogataj 455

The distribution-free newsboy problem: Extensions to the shortage penalty case
H.K. Alfares and H.H. Elmorra 465

The impact of aggregation level on forecasting performance
G. Zotteri, M. Kalchschmidt and F. Caniato 479

Fuzzy approach to the spatial games in the total market area
M. Bogataj and J. Usenik 493

Simulation-based optimisation of multi-echelon inventory systems
P. Köchel and U. Nieländer 505
